History

The FAA published in the **Federal Register** a final rule establishing Class E airspace extending upward from 700 feet above the surface at Dry Creek Airport, Cypress, TX (79 FR 22894, April 24, 2015). After publication FAA found the effective date was incorrectly

published as April 30, 2015, which does not ensure enough time for publication in the FAA's aeronautical database. The correct effective date is June 25, 2015. This action corrects the error.
